PROFESSIONAL SUMMARY

Passionate and results-driven B.Tech student specializing in Artificial Intelligence & Machine Learning at JECRC University (2023–2027). Skilled in building end-to-end AI-powered full-stack applications, from ML model development and deployment to crafting modern, responsive front-end interfaces. Experienced with the complete product lifecycle — ideation, UI/UX design, development, and cloud deployment. Actively seeking opportunities to apply AI/ML and full-stack expertise to real-world engineering challenges.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning <i>JECRC University, Jaipur, Rajasthan</i>	2023 – 2027 (Pursuing)
Senior Secondary (XII) – Science Stream <i>LBS Public School, Jaipur</i>	2023 74%
Secondary (X) <i>Gyan Vihar School, Jaipur</i>	2021 70%

EXPERIENCE

Backend Development Intern <i>Xebia IT Architects</i>	June 2026 – August 2026
---	-------------------------

- Completed an 8-week internship focused on backend development, contributing to backend systems and workflows under professional engineering guidance.
- Demonstrated sincere effort, active participation, and a commitment to professional growth throughout the internship.
- Received recognition for continuous learning and consistent engagement with the engineering team.

Freelance Automation Developer (Data Entry Automation) <i>12MTC (Freelance)</i>	March 2025 – March 2026
---	-------------------------

- Built a Python-based automation bot to streamline repetitive data entry tasks, reducing manual effort and turnaround time.
- Delivered ongoing freelance support over a 1-year engagement, maintaining and refining the automation workflow based on client needs.

TECHNICAL SKILLS

Frontend: ReactJS, NextJS, ViteJS, ChakraUI, Chart.js, Figma (UI/UX Design)

Backend: Node.js, Express.js, Flask, Python

DSA: Data Structures & Algorithms, Problem Solving (HackerRank)

Databases: MongoDB, PostgreSQL, Firebase, SQL

DevOps & Tools: Git, GitHub, Postman, Vercel, Render

PROJECTS

AutoDrive — Used Car Marketplace with ML Price Prediction *[NextJS · Python · Flask · Vercel · Render · Figma]*

Full-stack platform enabling users to browse used car listings with images, book test drives, and receive ML-powered price predictions. Designed end-to-end UI in Figma, built the NextJS frontend, developed the ML prediction model (regression), and deployed the API on Render with the frontend on Vercel.

CodeCraft — Developer Productivity Platform *[Full Stack · AI-Powered]*

End-to-end developer tool with AI-assisted features. Architected the system, developed backend APIs, and integrated AI capabilities to streamline code-related workflows.

Realtime Chat Application (In Development) *[NextJS · Socket.IO · Firebase · Vercel · Render]*

Designing and building a real-time messaging application with WebSocket support via Socket.IO/Firebase. UI designed in Figma with a focus on responsiveness and low-latency communication.

ACHIEVEMENTS & ACTIVITIES

- Active HackerRank profile with demonstrated proficiency in problem-solving and coding challenges.
- Developed and deployed multiple full-stack and AI/ML projects, demonstrating end-to-end engineering capability.
- Designed professional UI/UX mockups using Figma for production projects prior to development.
- Continuously building and publishing open-source projects on GitHub, showcasing consistent learning and development.
